

# WHEAT FIELD SCHOOL

## EMERGENCY WHEAT FREEZE EVENT

College of Agriculture,  
Food and Environment  
Cooperative Extension Service

This **free** program will be a series of short sessions by specialists to address the March freeze event and a hands-on training to assess wheat damage in the field.

The specialists request that participants attending the meeting in Princeton bring whole plant wheat samples from their farm to assess and compare to non-damaged wheat.

### Topics

Wheat Freeze Overview

Economic Considerations

Chemical Residues and Future Implications

Nitrogen Contribution to Corn if Wheat is Terminated

Livestock Feeding Potential if Grain is Not Harvested

Plant Dissection for Freeze Damage Demo

Question and Answer Session

Hands-On Wheat Freeze Assessment

## When

March 21<sup>st</sup>

Registration at 8am CST

Meeting Begins at 8:30am CST

All sessions of the meeting will be streamed over ZOOM (except the hands-on wheat freeze assessment).
