Introducing the “Weekly Weed Watch”

Corn, soybean, and wheat farmers face a number of uncertainties every growing season, but the one constant is that weeds will exist in their fields. A new YouTube video series called the “Weekly Weed Watch” was launched in March of 2021. The series releases one video a week highlighting a weed species that is of relevance for corn, soybean, and wheat farmers for that time of the growing season.

The video series has featured weeds such as annual ryegrass, marestail, henbit, purple deadnettle, wild garlic, and cressleaf groundsel so far. Current plans are to release one video per week through June.

You can check out the “Weekly Weed Watch” playlist on the “UK WeedScience” YouTube channel: [https://www.youtube.com/channel/UCgGSQJBJJ8uWH_M4c8-Y2Q/featured](https://www.youtube.com/channel/UCgGSQJBJJ8uWH_M4c8-Y2Q/featured)

2021 Wheat Field Day Update

The goal of the Wheat Science Group is to provide the highest quality program possible to meet the needs of our clientele. At this time, in the interest of public safety and with the continuously changing Covid-19 guidelines, the Wheat Science Group has opted to do a virtual program. The Wheat Webinar which will take place on May 11th from 9-10:30 am (Central Daylight Time). It will include a panel of experts to answer your wheat questions in real time, as well as short pre-recorded videos on (Integrated Pest Management, Soils, Wheat Breeding and Variety Testing). We look forward to seeing you and answering your questions on May 11th. See flyer for registration information.
WHEAT TALK
Your Wheat Questions Answered

Live Webinar
May 11, 2021
9 - 10:30 am (CDT)

Pre-registration required (ends 5/10/21)
https://uky.zoom.us/webinar/register/WN_wt7vEixUQSeg6Z3QSb6cOw
